

Installation Overview

Documentation Version 1.3, 12/12/2010

Short Description

This document describes the "Best Practice" to install MegaLog Program Suite.

Best Practice "Easy Installer"

If you plan to install and run all MegaLog modules from one single machine we suggest to use the "Easy Installer".

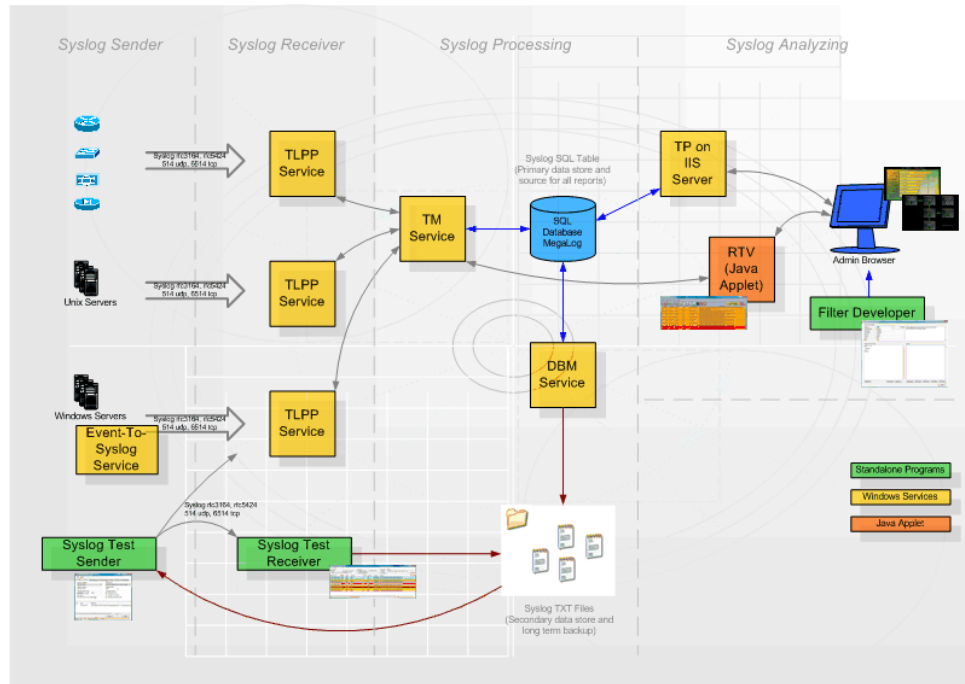

Please click on the "MegaLogSuite.msi" to start this installation.

Best Practice "Expert Installer"

If you plan to install and run MegaLog modules on several machines we suggest to use the "Expert Installer".

Please click on the symbols you want to install and follow the instructions..

We suggest the following install order.

Please note:

- After installing MegaLog DBM (step 2) the MegaLog database will be created automatically. Because of this you have to have a running SQL server installation before.
- The module MegaLog TP (step 4) has as a prerequisite a installed the IIS.

Install Order	Program Module	Detailed Documentation
1.	Prepare your SQL Server an IIS Service	<i>Download and Install:</i> http://www.microsoft.com/ for MS SQL Server 2005/2008 Express Edition or http://www.mysql.com/ for My SQL Server
2.	MegaLog DBM	<i>System Requirements:</i> System Requirements MegaLog.pdf <i>Installation:</i> Installation MegaLog.pdf <i>Basic Configuration:</i>

		Basic Configuration MegaLog.pdf
3.	MegaLog TM	<i>System Requirements:</i> System Requirements MegaLog.pdf <i>Installation:</i> Installation MegaLog.pdf <i>Basic Configuration:</i> Basic Configuration MegaLog.pdf
4.	MegaLog TP	<i>System Requirements:</i> System Requirements MegaLog.pdf <i>Installation:</i> Installation MegaLog.pdf <i>Basic Configuration:</i> Basic Configuration MegaLog.pdf
5.	Install MegaLog License	<i>License Procedure:</i> User Manual MegaLog.pdf Section "Config"/"License"
6.	MegaLog TLPP(s)	<i>System Requirements:</i> System Requirements MegaLog.pdf <i>Installation:</i> Installation MegaLog.pdf <i>Basic Configuration:</i> Basic Configuration MegaLog.pdf
7.	MegaLog Documentation (optional)	<i>System Requirements:</i> Adobe Reader
8.	MegaLog Tools (optional)	<i>System Requirements:</i> System Requirements MegaLog.pdf <i>Installation:</i> Installation MegaLog.pdf <i>Basic Configuration:</i> - not needed -

Typical Small Installation, use "Easy Installer"

If you expect less then 100 Events/Minute (144 k-Events/Day) this installation fits best.

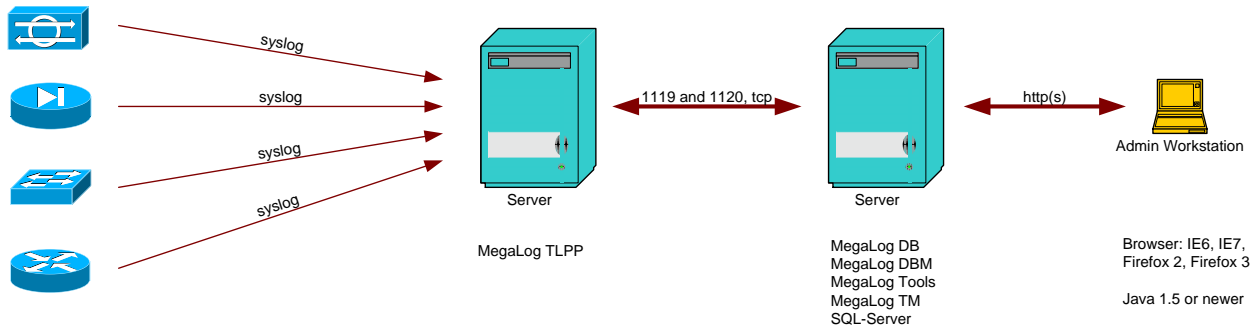

Typical Medium Installation,

use first "Easy Installer" then "Expert Installer" for the remote TLPP module.

If you expect less than 500 Events/Minute (1.000.000-Events/Day) this medium installation will fit.

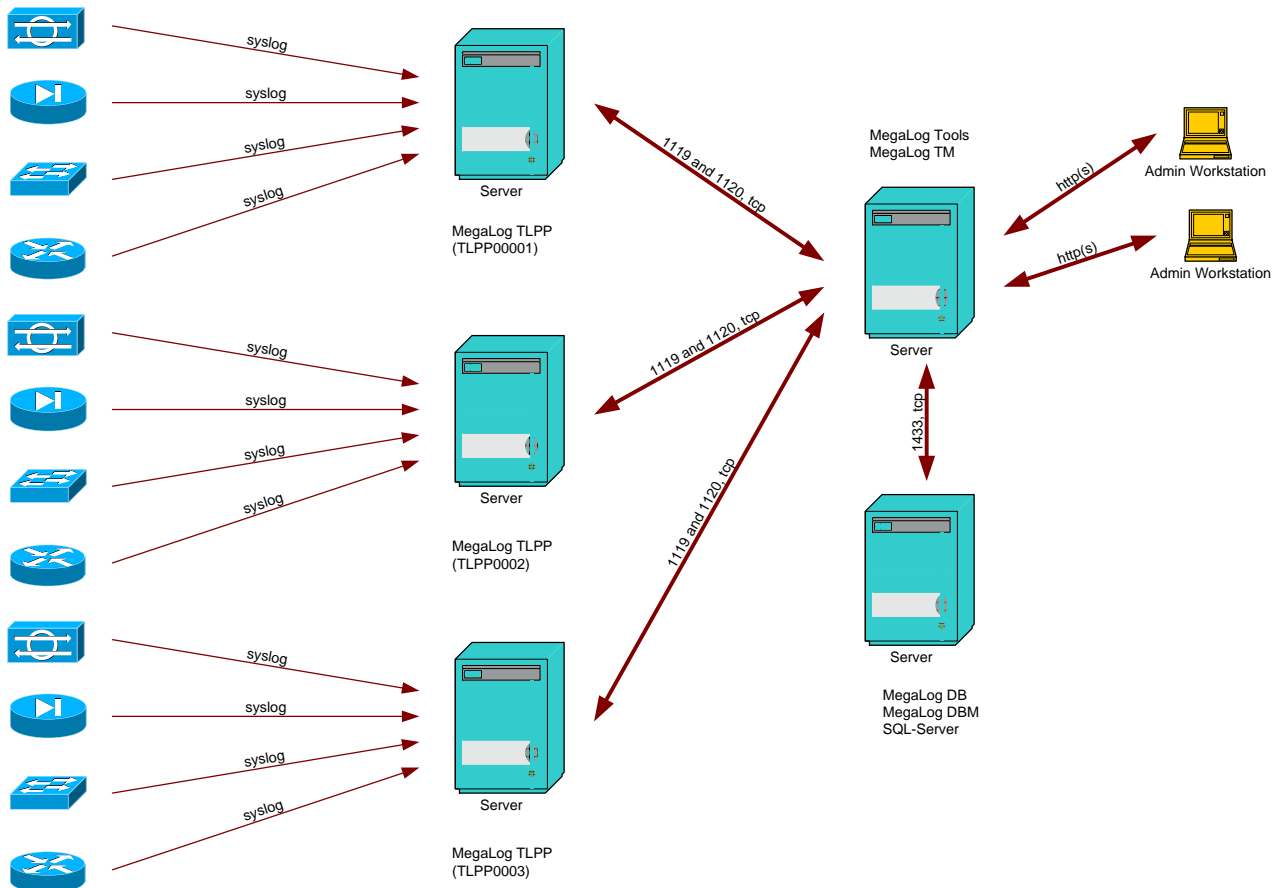

Please install "MegaLogSuite.msi" the core services and then with the "Expert Installer" additional TLPP Services (Syslog Agents).

Enterprise Installation, use "Easy Installer" for all modules

If you expect more than 500 Events/Minute (1.000.000-Events/Day) or you have special requirements (e.g. branch offices) then this enterprise installation would fit.

Please install steps 1 to 8 in this order on your servers with the "Expert Installer".
